RKN-4035A
PROGRAM/TEST CABLE

The RKN-4035A is a programming/test cable for the HT1000/MT2000/MTS2000 Series Portable Radios. It connects between the radio's universal connector and Radio Interface Box RLN-4008B (for programming) and the Portable Radio Test Set RTX4005B (for testing).

When plug assembly (4) is not used, cover with protective cap (6) to eliminate possible shorting.
